### ARDENHAM ENERGY APPOINTED SOLE UK DISTRIBUTOR FOR AMERISOLAR SOLAR ELECTRIC PV MODULES.

Aylesbury-based Ardenham Energy Ltd, a leading UK multi-technology renewable solutions company has been appointed exclusive distributor by the Solar Division of Worldwide Energy and Manufacturing USA Inc to market and distribute its range of solar PV modules in the United Kingdom.

The modules, recently certified by the Microgeneration Certification Scheme (MCS PV0018) are eligible for Low Carbon Building Programme, Feed In Tariff, and Code for Sustainable Homes projects. The modules are high quality and competitively priced with an industry-leading manufacturer's warranty of 10 years, as well as a 25 year limited power warranty.

The products will be available to all installers, developers and consumers in the UK from the beginning of 2010.

The appointment follows the installation of a 82 kWp array of 450 Amerisolar panels in Stratford-upon-Avon in the autumn of 2009. This is amongst the largest solar PV installations in the UK to date.

In April 2010 the Government will be introducing the "Clean Energy Cashback Scheme", a tariff where households who install solar electricity systems will be paid a proposed 36.5p / unit (kWh) for all electricity generated site, and an additional 5p / kWh will be paid for any excess electricity exported.

The distribution agreement will create employment opportunities in the UK, and help make the adoption of solar electricity systems more affordable to a larger market of homeowners, businesses, developers, schools and other organisations who wish to help reduce their CO2 emissions and generate their own energy.

#### Notes:-

Ardenham Energy is a renewable energy engineering and distribution company specialising in solar electricity, solar thermal, heat pump and energy management systems. The company is certified by the Microgeneration Certification Scheme to install domestic and public sector government grant assisted renewable energy projects, and "Feed In" Tariff based technologies in 2010.

Amerisolar - The Solar Division of Worldwide Energy and Manufacturing USA INC. (OTCBB: WWMU) is rapidly becoming a major player in the photovoltaic industry. Headquartered in San Bruno of California, Worldwide is reaching out to business and governments across the globe to provide for their energy needs. With over 14 years of rigid manufacturing quality control experience, Worldwide is committed to developing, manufacturing and maintaining the highest quality solar modules in the industry. Worldwide is ISO9001 certified, signifying the highest levels of excellence in the industry. Under the brand name of "AMERISOLAR" their solar modules provide electric power for residential, commercial, industrial and public utility applications throughout the globe.
